MORE THAN 1,000 CUSTOMERS FROM OVER 40 COUNTRIES

Juices & Purees.....6

Carefully processed and authentic in taste. We offer pasteurized ingredients for a fresh fruit bite experience, as well as unpasteurized, concentrate and in HPP quality.

Fruit Powders.....8

Our spray dried dehydrated fruits demonstrate good solubility in instant drinks. They can be used in sport powder mixes and food supplements in different forms.

Liquid Extracts.....10

Hydroalcoholic botanical extracts are ideal for soft drinks, beverages and liquid food. Our varieties deliver the authentic taste profile of their botanical raw material.

Powder Extracts.....12

The spray dried botanical extracts are standardized in active components. They can be applied to beverages, food, and nutritional supplements.

IQF.....14

IQF is individual fruit that is frozen immediately after harvest. This process preserves the ingredient's colour, flavour, minerals, vitamins and fibre.

Dices & Pieces.....14

Our wet dices, naturally high in fibre and in a range of sizes, bring a bite to your application. While our dry pieces, produced via drum drying technology, are a tasty and healthy snack.

Did not find what you were looking for?

Please do not hesitate to contact us. We will be happy to negotiate the ingredient you need with our worldwide partners.
